## SUMMARY

---

Software Developer with 5 years of experience building scalable web applications, enterprise dashboards, reusable frontend architecture, and cloud-supported software solutions. Experienced in delivering user-focused features, improving deployment efficiency and building responsive applications. Seeking Frontend-Leaning Full Stack Software Engineer roles focused on React, TypeScript, Node.js, APIs, databases, cloud, and product engineering.

## EXPERIENCE

---

- **PDF Solutions – Intel** Austin, TX  
*UI / Full Stack Developer* July 2023 – Present
  - Led front-end development of a React and TypeScript analytics interface that gave business users faster access to operational insights, reducing time-to-first insight by 50%.
  - Built visual exploration views using D3.js and Chart.js, replacing manual slide and spreadsheet workflows and helping analysts save 8-10 hours per week.
  - Designed and integrated REST and GraphQL APIs using Node.js and Express to efficiently serve large datasets, implementing batching, caching, and query optimization to improve performance and scalability.
  - Configured Jenkins CI/CD with Jest coverage thresholds and deployed to IIS server, ensuring only validated builds were released and test coverage stayed at 85%.
  - Owned a React Storybook-based design system with 75+ audited components and design tokens, adopted by 12+ projects to prevent inconsistent UI and duplicate component work.
  - Automated build, changelog, and Storybook publishing workflows using GitHub Actions and a private npm registry, reducing manual release effort.
  - Introduced automated documentation workflows using GitHub Copilot and GPT-4 for prop tables, test stubs, and docs, increasing development throughput by 30%.
- **Amazon** Austin, TX  
*Software Development Engineer* May 2022 – March 2023
  - Enhanced the Environmental Health & Safety platform used by 4,500+ sites in 42 countries by improving front-end flows and data handling, reducing workflow completion time by 25%.
  - Built a React, TypeScript, and GraphQL front end integrated with AWS Lambda, API Gateway, and MirageJS/AppSync to support serverless and mock-data development.
  - Developed reusable React and TypeScript components for forms, dashboards, and workflow screens, improving consistency across EHS modules and reducing repeated UI implementation.
  - Maintained CI/CD with AWS CodeBuild and CodePipeline and expanded automated tests with Jest, keeping coverage at 90% and releases consistent.
  - Added new features to AppSync models and lightweight REST services on AWS (Lambda, DynamoDB, SNS/SQS) to expose data needed by UI components.
- **University of Cincinnati** Cincinnati, OH  
*Graduate Assistant* May 2021 – April 2022
  - Mentored and guided student teams building full-stack applications in React and Node.js, providing technical feedback and reviewing work from a customer-experience perspective.

## SKILLS

---

**Languages:** JavaScript, TypeScript, HTML5, CSS3, SQL

**Frontend:** React.js, Angular, Storybook, D3.js, Chart.js, React Native, Next.js, Bootstrap

**Backend:** Node.js, Express.js, REST APIs, PostgreSQL, MongoDB, MySQL

**Testing:** Jest, React Testing Library, Cypress, Playwright, Karma, Jasmine

**Collaboration:** Figma, Zeplin, Jira, Confluence, VS Code, IntelliJ IDEA, Eclipse, DBeaver, pgAdmin.

**Cloud & DevOps:** AWS, EC2, EKS, S3, CloudWatch, Jenkins, Docker, Kubernetes, CI/CD

## EDUCATION

---

- **University of Cincinnati** Cincinnati, OH, USA  
*Master of Engineering in Computer Science - GPA: 3.6/4* Jan 2021 – Apr 2022
- **Anna University** Chennai, India  
*Bachelor of Engineering in Computer Science - 84%* Aug 2016 – Aug 2020
